Subject: "RightSizing" questions

All,

I sat down and asked Laura, Steve and Chris the questions below and here are the answers.

General information:

Region 8 has a draft long term strategy plan in place. It should be finalized and shared by Sunday or Monday and will probably answer some of the questions with more certainty.

●□□□□□□□□ Is START going to support the long term event?

○ That is unknown at this time, they believe the next long term phase is going to be taken over by the water program, I don't exactly which group though.

●□□□□□□□□ Will the viewer be utilized to support the event?

○ Their belief is that it will be the status quo but that would have to be vetted through PIO from Region, AC, HQ

●□□□□□□□□ What is the sampling strategy going to be?

○ From what the initial discussions have been Laura said that they will sample monthly, pre and post large rain event, twice in September during the dry season, and then in the spring.

▪ I'm assuming that Start will transition out of that roll prior after the September sampling events.

●□□□□□□□□ Will the public dissemination going to happen the same way?

○ Again they believe this will also stay status quo but the communication/approval will be slimmed down.

I don't have the answer you are probably looking for but I will have a better idea on Monday.
